Q & A with Simon

1. *When you are in the cinema, watching a film, do you often think about the background of the film and how it was made?*

- When he sees a really good film that absorbs him completely, he usually doesn't, but with other films he definitely does it often.

2. *Do you think that problems or anxiety should be immediately taken seriously?*

- Yes. It is important to take time to think about them.
- If possible, others should try and help people with anxiety through the hard times, and think about whether the current concerns are legitimate.

3. *Would you dare to work in Mecklenburg-Western Pomerania alone by yourself?*

- Compared to North Rhine-Westphalia, the population density of Mecklenburg-Western Pomerania is relatively low. So yes, he would definitely like to work there, preferably close to the nature, just like in his film.
